

Development articles vs poverty reduction, 2002 -> 2021 (\$2.15/day, 2017 ppp) across LMICs

Poverty reduction, 2002 -> 2021 (\$2.15/day, 2017 PPP) (millions of people lifted; log scale)

Note: 6 countries with zero or negative reduction (poverty held flat or rose) are omitted because log-x requires positive values. India is shown as an imputed point (linear interpolation between PIP surveys 1993/2004 and 2011/2022); excluded from slope.
